

WHO'S ELIGIBLE

Data collection forms are available for these specific sectors, or visit our website and complete the "Other" form if your building type is not listed below.

COMMERCIAL SECTOR

- Office buildings
- Data centers
- Supermarkets
- Retail stores

HIGHER EDUCATION SECTOR

Colleges, universities and community colleges

- Administrative offices
- Classrooms
- Dorms
- Athletic facilities (not including swimming pools)
- Laboratories

HOSPITALITY SECTOR

- Facilities
- Hotels
- Motels
- Inns
- Extended stay facilities
- Full service restaurants
(other food service outlets are excluded)

HOSPITAL/HEALTHCARE SECTOR

- Free-standing acute care
- Children's hospitals
- Free-standing medical office buildings
(including 24-hour and walk-in clinics)

INDUSTRIAL SECTOR

- Automobile assembly
- Cement manufacturing
- Chemical and pharmaceutical
- Corn milling
- Warehousing

INSTITUTIONAL SECTOR

- Public, private and non-profit governmental entities
- Public, private and non-profit social services organizations
- Schools K-12
- Houses of worship

MULTIFAMILY BUILDINGS SECTOR

- Residential housing of 4+ floors with a central heating/cooling system

ENERGY BENCHMARKING

Your benchmarking report will help identify the best investments for energy efficiency upgrades, many of which are eligible for financial incentives through *New Jersey's Clean Energy Program*.

New Jersey's Clean Energy Program is a statewide program administered by the New Jersey Board of Public Utilities that promotes energy efficiency and renewable energy for all New Jersey ratepayers, including residences, businesses, schools, and municipalities. For more information on incentives for clean energy and energy-efficient technologies for your home or business, please visit: NJCleanEnergy.com.

2012 Program Version

ENERGY BENCHMARKING

It's Free...and Essential

This rating system assesses building performance by analyzing energy use in your facilities and scoring it by comparing it to similar buildings. That can be a big help in identifying and prioritizing opportunities for cost-justified energy efficiency upgrades. And, based on our findings, you may be invited to participate in the Building Performance with ENERGY STAR® initiative and receive special recognition as an industry leader in energy efficiency.

You provide the data and we'll analyze your carbon footprint and building performance, including electricity and heating fuel usage that's scaled by square footage data and weather normalization. You'll receive a benchmarking report that you can use to quantify savings potential, to guide you in planning an energy efficiency project, and to learn which specific incentive program is right for your facility.

WHAT YOU'LL LEARN

Your free benchmarking report provides a snapshot of how much and in what way energy is used in your building and also offers guidance on how to get an energy efficiency project started. Your report will contain:

- **Data analysis graphs**
- **Analysis of fuel usage**
- **ENERGY STAR Portfolio Manager or Energy Performance Indicator (EPI) score (where applicable)**
- **Recommendations that lead to improving operations and maintenance**
- **Guidance on appropriate incentives and initiatives from *New Jersey's Clean Energy Program*™, along with information on how to apply**

HOW TO GET STARTED

Participating is easy with data collection forms that can be completed and submitted right from our website. Visit NJCleanEnergy.com/BENCHMARKING, fill out the form that matches your building type and submit it with our fuel authorization form so we can receive energy data from your suppliers.
