

Local Government Energy Audit

Lead by example now and for the future!

Take a leadership role in identifying energy savings opportunities in your local government facilities with *New Jersey's Clean Energy Program™* (NJCEP) Local Government Energy Audit (LGEA). Across New Jersey, residents and business owners are looking for ways to save energy and the environment. Local government customers can join this effort through participation in the exclusive LGEA program.

Get started with an audit

An NJCEP pre-qualified auditing firm will conduct an assessment equivalent to an ASHRAE Level-2 Audit and follow the program's strict parameters to analyze your buildings and prepare the audit report. The program subsidizes 100% of the audit cost up to \$100,000 per fiscal year.

Take steps towards efficiency

With your Local Government Energy Audit report, you'll have a clear guide on how to upgrade your buildings as well as the NJCEP incentives available to offset implementation costs. The report provides a detailed list of recommended energy-efficiency measures and facility upgrades that will reduce your building's energy use and operating costs.

Eligibility

The Local Government Energy Audit is available to select customers for a variety of buildings:

Eligible Customers

- municipalities
- local governments
- state contracting agencies
- public agencies
- state colleges and universities
- 501(c)(3) non-profit agencies

Building Type Examples

- offices
- town halls
- police and fire stations
- courthouses
