

DRAFT FOR PUBLIC COMMENT

**REMOTE NET METERING
PUBLIC ENTITY CERTIFICATION AGREEMENT**

The Clean Energy Act, P.L. 2018, Chapter 17, Section 6, requires the Board to establish an application and approval process to facilitate Remote Net Metering (“RNM”). Specifically, the application and approval process shall enable the Board to;

certify public entities to act as a host customer for remote net metering generating capacity. A public entity certified to act as a host customer may allocate credits to other public entities within the same electric public utility service territory. A copy of the agreement between the public entity certified to act as a host customer and other public entities designated to receive credits shall be provided to the electric public utility before remote net metering credits may be applied to a customer bill. A public entity certified to act as a host customer may host a solar energy project with a capacity up to the total average usage of the electric public utility accounts for the host public entity customer.

This form must be submitted by a Host Public Entity Customer (“Host Customer”) to the Electric Distribution Company (“EDC”) serving the Host Customer and be accompanied by an application to interconnect a solar electric generation facility with the EDC (Interconnection Application/Agreement – Part 1). The maximum facility size is to be calculated based upon the total average electricity usage of the host customer accounts listed below. To perform this calculation, the total usage of each account over the previous twelve months must be recorded herein, summed and divided by the number of accounts used for sizing purposes. The EDC shall review this Certification Agreement and recommend approval or rejection to Board Staff based upon the EDC’s review of the data submitted and account billing history. Board Staff will present the request for Public Entity Certification at a regularly Board Agenda meeting.

Host Customer’s Name: _____

Service Point Address: _____

City: _____ State: _____ Zip: _____

Primary Account Number: _____

(List other electric accounts for calculating max. generator size on Addendum A)

Contact Person: _____

Telephone Number: _____

Address: _____

City: _____ State: _____ Zip: _____

Email Address: _____

This application is for service from the [EDC NAME](#) pursuant to the Remote Net Energy Metering Order for the above Host Customer and identified Receiving Customers. This service is available to a public entity certified by the Board to act as a Host Customer who hosts a solar energy project with a maximum capacity up to the total average usage of the electric public utility accounts for the host public entity customer.

The Host Customer acknowledges that it has read the Remote Net Energy Metering Board Order and agrees to all terms and conditions contained therein including without limitation those specified in the Company’s interconnection tariff and the Company’s interconnection requirements. The Host Customer acknowledges that it is responsible for the customer charges, demand charges and other applicable charges under the applicable Rate Schedules of its accounts should it choose not to allocate credits to its own accounts. The Host Customer agrees not to operate its generator in parallel with the [EDC NAME](#) electrical system without specific approval in accordance with the EDC NAME interconnection requirements. Customers applying for service under Remote Net Metering assert that they meet the eligibility requirements including: 1) the total average usage of the host customer’s primary account and each additional, non-generating account in the name of the public host customer is used to determine maximum size of the solar electric generating facility. 2) other public entities designated to receive remote net metering credits are identified in the “Public Entity Certification Agreement – Addendum B”.

By this application, the Host Customer asserts that they have read, understand and are in compliance with the Remote Net Energy Metering Order and any subsequent tariff or Rider established for this purpose, available at: [THE EDC TARIFF WEBSITE](#) and; that the information provided above and attached to the end of this application is correct to the best of their knowledge.

REMOTE NET METERING PUBLIC ENTITY CERTIFICATION AGREEMENT (ADDENDUM A) Host Customer Accounts

Host Customer's Name: (same as on Page 1) _____

Host Customer's Primary Account Number: _____

Usage in previous 12 months: _____ (kWh)

List eligible non-generating accounts in the Host Customer's name for purposes of determining maximum generator size. (Use additional pages if necessary).

Host Account # 2: _____

Service Point Address: _____

City: _____ State: _____ Zip: _____

Account Number: _____

Usage in previous 12 months: _____ (kWh)

Host Account # 3: _____

Service Point Address: _____

City: _____ State: _____ Zip: _____

Account Number: _____

Usage in previous 12 months: _____ (kWh)

If more than 3 accounts are intended to be used for determining maximum solar generation facility size, then attach additional copies of Addendum A.

| Host Account Number | Total Usage |
|----------------------|-------------|
| 1. | |
| 2. | |
| 3. | |
| Sum of Usage: | |
| Total Average Usage: | |

**REMOTE NET METERING PUBLIC ENTITY CERTIFICATION AGREEMENT
(ADDENDUM B) Designated Credit Receiving Customers**

List eligible "Designated Credit Receiving Customer Accounts" in the order in which excess energy from the Host Customer account should be applied in accordance with the Remote Net Energy Metering Order (Use additional pages if necessary).

Receiving Customer #1's Name: _____

Receiving Customer #1's Account Number: _____

Service Point Address: _____

City: _____ State: _____ Zip: _____

Authorized Signature: _____
