

Annual Net Metering Report

June 2005

Rockland Electric Company

Rockland Electric Company

Annual Net Metering Report

June 2005

1. The total number of customer-generator facilities

For the one-year period ending May 31, 2005, Rockland Electric Company (the "Company") has nine customer-generator facilities.

2. The total estimated rated generating capacity of its net metering customer-generators

The total estimated rated generating capacity of its net metering customer-generators is 61.7 kW.

3. The total estimated net kilowatt-hours received from customer-generators

The total net kilowatt-hours received from customer-generators for the one-year period ending May 31, 2005 is zero kilowatt-hours. The net energy usage by these customer-generators for the one-year period ending May 31, 2005 is 113,190 kilowatt-hours.

4. The total estimated amount of energy produced by the customer-generators

Since the generators of the net metering customers are not separately metered (the meter is located at the customer's service entrance), the Company cannot determine the amount of energy produced by these customer-generators.
