

Annual Net Metering Report

June 2006

Rockland Electric Company

Rockland Electric Company

Annual Net Metering Report

June 2006

1. The total number of customer-generator facilities

For the one-year period ending May 31, 2006, Rockland Electric Company (the "Company") has sixteen customer-generator facilities.

2. The total estimated rated generating capacity of its net metering customer-generators

The total estimated rated generating capacity of its net metering customer-generators is 111.6 kW.

3. The total estimated net kilowatt-hours received from customer-generators

The total net kilowatt-hours received from customer-generators for the one-year period ending May 31, 2006 is zero kilowatt-hours. The net energy usage by these customer-generators for the one-year period ending May 31, 2006 is 224,888 kilowatt-hours.

4. The total estimated amount of energy produced by the customer-generators

Since the generators of the net metering customers are not separately metered (the meter is located at the customer's service entrance), the Company cannot determine the amount of energy produced by these customer-generators.
