

Completed and committed *Home Performance with ENERGY STAR*<sup>®</sup> projects have reached the original budget level approved in December 2009 for 2010. We are currently accepting applications, but not approving any new projects. The Board approved revised 2010 budgets last week that increased the budget for the Home Performance program and we will recommence approving projects once the Board Order approving the new budget is signed. We anticipate that the Order will be signed this week. Projects will be reviewed in the order they were received.
