

T-12 Schools Lighting Initiative Notice
July 18, 2012

The NJCEP has received applications in excess of the \$6 million in funds allocated to the T-12 Schools Lighting Replacement Initiative. Therefore, effective immediately, no additional applications will be accepted.

BPU Staff, in coordination with the Market Manager and the Program Coordinator, will evaluate the current 2012 NJCEP approved budget in light of the recent FY 13 state budget appropriations and determine if and when additional funds may be available. This will include opportunity for stakeholder comments on any proposal additional budget. Any request for additional funding for this program will require the Board approval. The timing of any subsequent request for the Board's consideration of additional funding for this program, in a best case timeframe, cannot be made until the Board's September agenda meeting.

We will work with the Department of Education to keep all schools up to date on this issue and provide updates on the NJCEP website.
