

Notice of Small CHP and Fuel Cell Program Changes

Currently, the existing small CHP/Fuel Cell program offers incentives for eligible systems of any size. On April 25, 2012 the Economic Development Authority ("EDA") released a competitive grant solicitation for large CHP/Fuel Cell systems greater than 1 MW.

In order to better align the small CHP/Fuel Cell program with EDA's new large CHP/Fuel Cell program, the small CHP/Fuel Cell program will be **limited to systems less than or equal to 1 MW.**

This change will take effect on **Monday, July 23rd, 2012.**
