**Subject:** [PJM-GATSSG] Updates coming to GATS

**Importance:** High

Dear Subscribers,

A number of enhancements are being made to the GATS system at the request of a variety of State Agency's as well as Subscribers. The following enhancement will be available to the Subscribers as of November 1, 2013:

- **Generator Registration Screen**
  - *Initial Meter Reading*

Subscribers will be required to enter in an Initial Meter reading and reading date now upon initial generator registration
  - *Multiple Meters*

Subscriber will have the ability to indicate if multiple meters exist to support generation entry from multiple meters
- **Generation Entry Screen**
  - *Multiple Meters*

At the request of the NJ BPU, Subscribers will have the ability to report readings from multiple meters rather than aggregating the readings together
  - *Solar Thermal generators*

Solar Thermal generators will have the capability to report their generation as Btu or kWh at the request of the Ohio Public Utility Commission
  - *Removal of Production Estimates*

Production Estimates were removed from the generation entry screen at the request of the NJ BPU with the concurrence of other state regulatory commissions.
  - General look and feel of the Generation Entry Screen

The Training and Reference Materials will be updated to reflect these changes by November 1, 2013 as well.

Sincerely,

*Gayle Dean*
