

Local Government Energy Audit

For a CLEANER and GREENER Future for New Jersey

New Jersey's Clean Energy Program empowers your choice for a clean energy future. It's true! By implementing energy efficient practices, you can help make a positive impact on our climate. The LGEA program offers free energy audits to local government agencies, state colleges and universities, K-12 public schools, and non-profit organizations, supporting their efforts for improved energy use.

Benefits

Identify the facility's existing conditions and recommend energy conservation measures to reduce operating expenses and protect the environment.

- Inventory of energy-consuming equipment
- Comprehensive utility bill analysis
- Facility benchmarking
- Screenings for solar, combined heat & power, and electric vehicle charging stations

Incentives

FREE audit with no upfront costs or required next steps.¹ Incentives available through local utility for implementing recommendations.

Eligibility

Available to buildings with a minimum monthly average of 200kW:

- NJ local government agencies²
- NJ state colleges and universities
- NJ K-12 public schools
- 501(c)(3) non-profit organizations

¹ Some large audits may need to be phased over different fiscal years

² Municipal, county, and state buildings

Be Energy Efficient

- Energy efficient buildings cost less to operate
- Energy efficiency programs improve energy equity
- Energy efficiency buildings minimize the need for fossil fuels, combating climate change
- Energy efficiency improvements lessen power grid loads
- Reducing fossil fuels positively affects overall human health with cleaner air, water, and land

- U.S. Department of Energy
