

A New Approach to

New Construction

Lower your Building Costs While
Creating a Clean Energy Future

New Jersey's Clean Energy Program introduces a new approach to building a clean energy future. The New Construction Program offers different pathways to qualify for incentives.

High Performance Pathway

\$1.00 - \$2.50 per square foot

- Available for residential and non-residential buildings
- Deeper energy savings with tiered incentives
- Bonus incentive available for greenhouse gas reduction 

Streamlined Pathway

\$0.50 per square foot

- Available for non-residential buildings with simple designs
- 5% more efficient than code compliant building
- Bonus incentive available for greenhouse gas reduction 

Bundled Pathway

\$0.25 per square foot

- Available for non-residential buildings
- Requires two or more eligible energy efficiency improvements
