## Customer Onsite Renewable Energy Program

### Rebate Application Form: Requirements/Instructions/Terms and Conditions

Before completing the attached Customer Onsite Renewable Energy Program Rebate Application Form and the related Technical Worksheet, please carefully read all of the information in Sections A, B and C, below.

#### A: Rebate Qualification Requirements

- 1. The system must be installed in New Jersey.
- 2. System must be installed in accordance with requirements specified in the New Jersey Clean Energy Program Technical Worksheet for that type of equipment (i.e., solar electric, wind or biomass), and it must come with owner's manuals and warranty documentation.
- 3. Only new equipment is eligible for rebates.
- 4. System warranty must be all-inclusive for at least 5 years.
- 5. Customer must receive a letter of rebate commitment from the New Jersey Board of Public Utilities (NJBPU) prior to installation. Equipment must be installed within a predetermined time period as specified in the commitment letter.\*
- 6. Rebates will not be processed without a Federal Tax Identification number, Contracts, and authorized signatures from the Applicant and Installer.
- \*\* Updates to the Program requirements are subject to change. Please refer to the website (www.njcep.com) for updates under CORE Program updates.

#### **B:** Instructions For Completing the Rebate Form

- 1. Complete all of Sections A through E of the Rebate Application Form and all sections of the appropriate Technical Worksheet. All information is necessary for processing applications and rebates. Illegible or incomplete Application Forms and/or Technical Worksheets will be returned to the Applicant.
- 2. Mail completed Rebate Application Form and appropriate Technical Worksheet to the NJBPU (see "Contact Information"); retain a copy for your files.
- 3. Once your Rebate Application Form has been reviewed and approved, the NJBPU will send you a confirmation letter. To be eligible to receive a program incentive, you must receive this rebate commitment letter from the NJBPU prior to equipment installation. You will also be sent a Final Application Form.
- 4. Applicant must purchase a qualifying system and have it installed according to Program Installation Requirements within 9 months of the application approval date for small (<10 kW) systems and within 12 months for medium and large (>10kW) systems.\* Any changes between the initially proposed system and the installed system must be fully documented and are subject to NJBPU approval.
- 5. After the approved system is installed, the Applicant (or Installation Contractor) must submit the following to the NJBPU: a completed Final Rebate Application Form; invoice copies; proof of payment (copies of cancelled checks and credit card receipts); and a copy of the completed Interconnection Application and Electrical Code Inspection.
- 6. After the installation is completed and the system has passed the local municipal NEC code inspection, the NJBPU inspector should be notified to schedule the final rebate inspection. When the system passes this inspection and all appropriate paperwork is received, the rebate will be processed by the NJBPU and mailed to the appropriate party.

#### C: Important Terms and Conditions

- 1. To receive a rebate, Applicant must agree to an inspection by a NJBPU representative or designated contractor. Applicant must also agree to allow the CEP to monitor (install metering) the facility's energy usage to verify savings.
- 2. The NJBPU reserves the right to modify or withdraw this program. Program procedures and rebate levels are subject to change or cancellation without notice. Approved projects will be honored under the terms stated in the commitment letter.
- 3. Installation must comply with the host utility's Interconnection Requirements, which are available online; these include Operation/Disconnection Procedures, Liability/Indemnity and Insurance Requirements according to the size of the project.
- 4. Rebates will be processed based on the date the NJBPU approves the Final Application, not the purchase date of the equipment. Approved projects will be honored under the terms in the commitment letter.
- 5. To qualify for a rebate, the Applicant must comply with the Installation Requirements in the appropriate Technical Worksheet. For more information about the New Jersey Clean Energy Program, or for assistance in completing an Application, please contact the NJBPU at the number listed (see "Contact Information").
- 6. For information on Net Metering, please contact your utility.
- 7. Incentives are intended to enhance the affordability of clean energy generation systems. Systems should be installed according to manufacturer's instructions. For systems installed inconsistent with such requirements, the Rated System Output may be de-rated.
- 8. Portable systems are not eligible for incentives under this Program.
- 9. Information may be subject to the Open Public Records Act requirements. Aggregated Information will be used in reports and evaluations, and the geographic location will be used to update GIS mapping.
