

Successor Solar Incentive (SuSI) Program Administratively Determined Incentive (ADI) Program's Remote Net Metering Solar Facilities RNM Extension Request Checklist

Remote Net Metering solar facilities registered in the ADI Program may be eligible for one six-month extension at the discretion of the ADI Program Manager, as determined on a case-by-case basis. All extension requests must be submitted in the registration online portal on or before the registration's expiration date, noted in the RNM conditional acceptance letter.

Extension requests that are submitted after the expiration date will not be considered and the registration will be cancelled. In the case of an RNM registration cancellation, if the capacity cap has been reached, you will no longer be eligible to submit a new registration in this capacity block and will be required to wait until the next capacity block is opened to submit a new registration.

If the extension is granted, the ADI Program Manager shall provide a new RNM registration expiration date, six months from the expiration of the original conditional acceptance letter.

Extension requests must demonstrate the following:

- 1) The delays for not completing the installation of the solar facility by the expiration date were due to extenuating circumstances.
- 2) Evidence that the facility has made progress toward completion, and the likelihood of timely and successful completion of the solar facility.

Developers and owners seeking an extension must submit the following documentation in the registration online portal on or before their expiration date:

- A cover letter explaining the reason for the delay in completing the solar installation.
- Date-stamped evidence that project representatives attempted to communicate with local code officials (e.g., emails with the local code officials requesting an inspection); or, if the project has already passed local code inspections, include copies of permits.
- Submit a copy a Complete Part I Interconnection Application approval (Approval to Interconnect) from the EDC and/or evidence that the application to energize (Part II of the interconnection application) was submitted to the EDC.

Remote Net Metering Solar Facilities
RNM Extension Request Checklist**

- Date-stamped photographs of the solar equipment
- A RNM Milestone Reporting form is required to be submitted as part of the extension request packet. Timely submission of quarterly Milestone Reporting forms will be taken into consideration by the ADI Program Manager for projects seeking an extension.
- Any additional information as may be requested by the ADI Program Manager for purposes of determining a project's eligibility for an extension.

Any solar facility that would like to submit a request for a second extension must submit a petition to the Board Secretary, for consideration. Instruction for submitting a petition can be found on the [NJBPU homepage](#) under the Dispute Resolution.
